Education

Bachelor of Science in Software Engineering

Expected April 2026

Schulich School of Engineering, University of Calgary

Skills

Languages: Python, Java, C, C++, SQL, JavaScript, HTML, CSS

Technologies: Git, Docker, JUnit, Spring Boot, MySQL, Kubernetes, Jira, Linux, PostgreSQL, Power BI

Experience

Swim Instructor and Lifeguard

January 2019 - March 2020

Westside Recreation Centre | Calgary, Alberta

- Managed and instructed over 20 swimmers a season by creating lesson plans for multiple classes and adapting teaching methods based on student's skill levels
- Delivered regular performance evaluations and feedback for swimmers enhancing communication and collaboration skills
- Followed strict safety protocols with attention to detail and a proactive approach to identifying potential issues

Projects

Personal Website

JavaScript, HTML, CSS

- Created a website to showcase my skills ensuring cross-device compatibility for an optimal user experience on desktops, tablets, and mobile devices
- Optimized JavaScript execution and streamlined image assets reducing mobile loading times by 31% resulting in faster page responses and improved user satisfaction
- Utilized JavaScript to implement an interactive canvas animation enhancing engagement and keeping visitors with dynamic visual effects

University Lab Booking

Java, SQL

- Implemented robust backend functionalities using MySQL databases and Java queries to enable efficient data retrieval and operations for various user roles
- Created an enhanced entity-relationship diagram on Lucidchart to accurately represent and manage complex relationships between students, maintenance staff, lab managers, and administrators
- Allowed students to reserve lab time slots, book equipment and resources, and report damaged equipment directly to maintenance staff improving resource utilization

Stock Data ETL & Visualization Pipeline

Python, PostgreSQL, Power BI

- Created an ETL pipeline fetching daily stock market data (NVDA, AAPL, MSFT) using Python requests and pandas
- Applied data transformations, including date normalization and adjusting historical prices for stock splits
- Stored processed data in PostgreSQL and leveraged Power BI for creating interactive dashboards and trend analysis

Extracurricular

Collegiate League of Legends Team

September 2022 - April 2023

Top Lane Role

- Competed at a high level on the main roster for the University of Calgary's League of Legends team
- Achieved 1st place in the Battle of Alberta, competing against other universities in Alberta
- Achieved 5th place in the 2023 West Conference CLOL playoffs, competing against 16 universities
- Participated in weekly 3-hour scrims against other Canadian universities and dedicated 15+ hours weekly to ranked solo queue practice
