Education

Bachelor of Science in Software Engineering

Expected May 2026

Schulich School of Engineering | University of Calgary

- **Coursework:** Database Management, Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Software Architecture, Software Testing, Distributed Systems, Software Design, Computer Security, Data Science and Scalable Data Analytics

Technical Skills

Languages: Python, Java, C, C++, SQL, JavaScript, HTML, CSS

Technologies: Git, Docker, JUnit, Spring Boot, MySQL, Kubernetes, Jira, Linux, PostgreSQL, Power BI

Experience

Swim Instructor and Lifeguard

January 2019 - March 2020

Westside Recreation Centre | Calgary, Alberta

- Managed and instructed over 20 swimmers per season by creating tailored lesson plans for multiple classes, adapting teaching methods to various skill levels, and providing regular feedback to enhance progress
- Monitored pool areas with vigilance, ensuring adherence to strict safety protocols and promptly addressing potential hazards to prevent accidents

Projects

Stock Data ETL & Visualization Pipeline

November 2024 - December 2024

Python, PostgreSQL, Power BI

- Implemented an ETL pipeline using Python's requests library to extract daily historical stock data for NVDA, AAPL, and MSFT from the Alpha Vantage API, transforming raw JSON into clean structured datasets with pandas for downstream analysis
- Performed data transformations on stock market data, including date normalization, conversion of JSON data into tabular formats, and precise adjustments to historical prices to account for stock splits
- Stored transformed stock market data in a PostgreSQL database and created interactive Power BI dashboards for trend analysis, utilizing line charts to visualize historical price movements

Personal Website

July 2024 - August 2024

JavaScript, HTML, CSS

- Built a personal website with adaptive layouts that dynamically adjust to mobile, tablet, and desktop devices by employing a fluid grid system and flexible images
- Optimized JavaScript execution and streamlined image assets, reducing mobile loading times by 31%, as reported by Google PageSpeed Insights
- Developed a canvas animation using pts.js, leveraging the Line.perpendicularFromPt function to calculate and render lines between distributed points, dynamically rotating elements

University Lab Booking

January 2023 - April 2023

Java, SQL

- Developed backend systems using MySQL and Java PreparedStatements, enabling lab users to reserve lab time slots, book equipment and resources, report equipment issues, and manage schedules
- Designed a database schema on Lucidchart to manage interconnected entities, such as user roles with attributes (e.g., user ID, email, and type) and their relationships with lab schedules, maintenance requests, and equipment statuses

Extracurricular

Collegiate Esports Team

September 2022 - April 2023

League of Legends | University of Calgary

- Competed on the main roster for the University of Calgary's League of Legends team, achieving 1st place in the Battle of Alberta and 5th place in the 2023 West Conference CLOL playoffs against 16 universities
