Education

Bachelor of Science in Software Engineering

Expected May 2027

Schulich School of Engineering | University of Calgary

- **Coursework:** Database Management, Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Software Architecture, Software Testing, Distributed Systems, Software Design, Computer Security, Data Science and Scalable Data Analytics
- **Certificates:** Full-Stack Engineer Career Path — Codecademy, Engineering Leadership Program Tier 3 — University of Calgary

Technical Skills

Languages: Python, Java, C, C++, SQL, JavaScript, HTML, CSS

Technologies: Git, JUnit, Spring Boot, MySQL, Podman, Docker, Kubernetes, Grafana, Linux, Unix, PostgreSQL, Power BI, Visio, Jira, ClickUp

Experience

Server Infrastructure Intern

May 2025 - August 2025

Alberta Health Services | Calgary, Alberta

- Developed Grafana dashboards using LogQL to visualize critical server metrics such as kernel high-severity logs, failed SSH logins, and out-of-memory events, streamlining triage and root cause analysis during weekly team meetings
- Developed Python scripts with SQL queries to identify servers that missed patching windows and other data inconsistencies, visualizing results in Grafana dashboards
- Authored a Podman adoption guide for development teams, detailing migration strategies from Docker to Podman and Docker Compose conversion using the Kompose tool
- Created clear documentation in Microsoft Visio outlining patching workflows for Unix (IBM AIX) and Linux (RHEL and OEL) servers

Swim Instructor and Lifeguard

January 2019 - March 2020

Westside Recreation Centre | Calgary, Alberta

- Managed and instructed over 20 swimmers per season by creating tailored lesson plans for multiple classes, adapting teaching methods to various skill levels, and providing regular feedback to enhance progress
- Monitored pool areas to ensure adherence to strict safety protocols and promptly addressed potential hazards to prevent accidents

Projects

Stock Data ETL & Visualization Pipeline

November 2024 - December 2024

Python, PostgreSQL, Power BI

- Implemented an ETL pipeline using Python's requests library to extract daily historical stock data for NVDA, AAPL, and MSFT from the Alpha Vantage API, transforming raw JSON into clean structured datasets with pandas for downstream analysis
- Performed data transformations on stock market information, including date normalization, conversion of JSON data into tabular formats, and precise adjustments to historical prices to account for stock splits
- Stored transformed stock market data in a PostgreSQL database and created interactive Power BI dashboards for trend analysis, utilizing line charts to visualize historical price movements

Extracurricular

Collegiate Esports Team

September 2022 - April 2023

League of Legends | University of Calgary

- Competed on the main roster for the University of Calgary's League of Legends team, achieving 1st place in the Battle of Alberta and 5th place in the 2023 West Conference CLOL playoffs against 16 universities
